

**REMARKS/ARGUMENTS**

Reconsideration and allowance in view of the amendment and remarks filed December 7, 2005 as supplemented by the amendment to claim 1 above is respectfully requested.

On further reflection, it was realized that characterizing the supportive magnet 8 as being disposed at a radial center of the second magnetic member (rather than "axial center") more accurately characterizes the disposition of the supportive magnet. Therefore, claim 1 has been revised above in this regard for clarity.

Early and favorable reconsideration are respectfully requested.

Respectfully submitted,

**NIXON & VANDERHYE P.C.**
